

Plakat: Sådan smager vi

Faglige temaer: De fem grundsmage, Smagens fysiologi

Introduktion:

Tungen har omkring 5000 smagsløg, også kaldet papiller, der kan opfange smagen af det, der er i munden. Hvert smagsløg kan opfatte de fem grundsmage sur, salt, sød, bitter og umami. Tag udgangspunkt i denne plakat, hvis du vil undervise dine elever i smagssansen.
